

A man with short brown hair and a light beard is smiling and looking down at a laptop. He is in a server room or data center. In the background, there are blurred server racks and colorful, abstract data visualizations in shades of blue, green, and pink. The overall lighting is dark with vibrant highlights from the screens and lights.

NEXTLABS

Zero Trust
Data-Centric Security

Securing Microsoft Ecosystems

Set the standard for safeguarding data across all ecosystems

NEXTLABS

Zero Trust
Data-Centric Security

NextLabs® patented dynamic authorization technology and industry leading attribute-based zero trust policy platform helps enterprises identify and protect sensitive data, monitor and control access to the data, and prevent regulatory violations – whether in the cloud or on premises

Safeguard Information Sharing and Enable Secure Collaboration

NextLabs empowers organizations to boost collaboration and productivity while securing business transactions across the entire Microsoft ecosystem. Our advanced solution offers data masking and filtering capabilities to safeguard sensitive sales, marketing, and service. Regardless of the Microsoft server, device, or desktop, NextLabs discovers, classifies, and protects data for secure sharing.

Across all collaboration methods —portals, emails, forums, or cloud —NextLabs ensures frictionless, data-centric security (DCS). Our solution controls access to sensitive files, prevents unauthorized email and attachment transmissions, and secures discussions on platforms like Skype and Teams. Additionally, we provide comprehensive protection for your critical assets by securing global data access across all major Microsoft databases in the cloud.

Safeguarding:

AI & Analytics
