

Entitlement Manager for SharePoint Online

THE SITUATION

Microsoft SharePoint Online is a cloud service that enables companies to collaborate and share data seamlessly across the organization. However, when you're dealing with highly sensitive data, such as intellectual property, regulated data, or personally identifiable information, extra care must be taken to secure that data.

THE SOLUTION

NextLabs' Entitlement Manager for SharePoint Online (EM for SPOL) provides granular controls over documents stored in SharePoint Online. EM for SPOL enforces whether users can upload documents or whether they can view rights-protected files in SharePoint Online. At the end of the day, NextLabs automates information controls on SharePoint Online data to enable secure collaboration.

Key capabilities include:

- Data Classification Policies
- Access and Usage Control Policies
- Integrated Rights Management Policies
- Centralized Audit and Reporting

THE BENEFITS

EM for SPOL provides the following benefits:

- Enable secure collaboration (both internally and externally) with customers, partners, and other third parties
- Automate information controls to simplify data access governance, eliminate mistakes, and reduce cost
- React more rapidly to changes in business requirements, market conditions, or regulatory environment since policy changes can be made without requiring code changes or application downtime
- Reduce the cost of compliance through more efficient and cost-effective monitoring and audit of your data

KEY FEATURES

Feature	Detail
Data Classification Policies	<ul style="list-style-type: none">■ Apply classifications to files uploaded to SharePoint Online in the form of metadata tags■ Tag documents individually upon upload, based on identity of the user uploading the document
Access and Usage Control Policies	<ul style="list-style-type: none">■ Allow or block access to a document or a location in SharePoint Online■ Control which users can upload documents to SharePoint Online■ Prevent users from uploading documents based on user attributes such as name, department, email ID, etc.
Integrated Rights Management Policies	<ul style="list-style-type: none">■ Enable administrators to classify and encrypt documents when the documents are uploaded to SharePoint Online■ Enable administrators to specify the user groups that are allowed to view rights-protected files■ Enable persistent protection that prevents unauthorized users from accessing files
Centralized Audit and Reporting	<ul style="list-style-type: none">■ Provide audit logs and reports to ensure compliance with applicable regulatory or corporate governance requirements

ABOUT NEXTLABS

NextLabs provides data-centric security solutions to protect business-critical data and applications. Its patented policy-driven dynamic authorization platform helps enterprises identify and protect data, monitor and control access to sensitive data, and help prevent regulatory violations—whether in the cloud or on-premises. NextLabs' solutions automate the enforcement of security controls and compliance policies to enable secure information sharing across the extended enterprise. NextLabs has some of the largest global enterprises as customers and has strategic relationships with several industry leaders.
